PROJECTS

Weather Site

Jul 2025 - Aug 2025

- Built a fully Responsive Weather web app with real-time city-based weather using Open Weather API.
- Designed intuitive UI using HTML, CSS, and JS. Deployed on GitHub pages

[Jarvis ↗](#)

May 2025 - Present

- Jarvis – My Voice-Controlled AI Assistant:
- The core idea behind Jarvis is to deliver smart and responsive answers in any situation.
- It performs Wikipedia searches, cracks jokes, opens applications via voice commands, plays songs from web sources, suggests various recipes, and controls system settings, sports updates, News updates and more. gives interactive responses, and more—all triggered by a simple voice command: "Hey Jarvis..."
