PROJECTS

Jarvis ↗
May 2025 - Present

Jarvis – My Voice-Controlled AI Assistant
The core idea behind Jarvis is to deliver smart and responsive answers in any situation. It performs Wikipedia searches, cracks jokes, opens applications via voice commands, plays songs from web sources, suggests various recipes, and controls system settings (like setting brightness to 30%). It also provides sports updates, gives interactive responses, and more—all triggered by a simple voice command: "Hey Jarvis...".
What makes Jarvis unique is its ability to handle multiple tasks seamlessly using natural language input. From fun interactions to functional controls, it brings together Python modules and APIs to create a dynamic, personal AI experience.

SKILLS

- HTML
- C Programming
- Java
- CSS
- Python
- React
- JavaScript
- Data Structures
- Flask

EXTRA CURRICULAR ACTIVITIES

- Participated in NSS and NCC and upgraded my soft skills like ,
  1. Discipline
  2. Leadership
  3. Self-control
  4. Social service
  5. Time management
  6. Punctuality
  7. Communication

ADDITIONAL DETAILS

- Educational qualification : SSC BOARD (10th) -91% BIEAP(11th & 12th) - 90% JEE(2024) - 78% Rank - 3,58,234 EAMCET RANK - 40,000
- Certified by many top IT Companies like Linkedin, Microsoft, Skillup, be10x and HackerRank in various Ai fields, Gen Ai ,Prompt Engineering, JavaScript etc.
