PROFESSIONAL SUMMARY

Full-Stack Developer skilled in Python, React, and Cloud technologies with hands-on experience building AI-powered and data-driven applications. Developed a voice-controlled AI assistant, deployed scalable full-stack projects, and completed a Data Analytics internship at TATA. Passionate about leveraging GenAI, data analytics, and cloud platforms to deliver innovative solutions. Solved 80+ Data Structure & Algorithms problems on Leetcode demonstrating strong problem-solving skills. Seeking to contribute technical expertise and problem-solving skills to dynamic software teams.

EXPERIENCE

Data Analytics. Internship

07/2025 – 08/2025

TATA

- Conducted Exploratory Data Analysis (EDA) and built predictive models using Python and machine learning techniques.
- Improved data quality by handling missing values and optimizing preprocessing pipelines.
- Received recognition and appreciation from Forge company for project contributions

PROJECTS

AI-Powered Personal Voice Assistant (Jarvis)

Python-based Intelligent Assistant | Individual Project

- Engineered a Python-based voice-controlled AI assistant capable of performing hundreds of tasks (weather, news, search, jokes, dictionary, music, Reasoning, automation etc.)
- Integrated persistent memory (JSON-based) to remember user preferences, history, and context across sessions, making Jarvis more adaptive and personalized.
- Implemented advanced logical reasoning & multi-step problem solving, enabling Jarvis to solve riddles, puzzles, math problems, and real-world scenarios with >97% accuracy.
- Designed for a natural, human-like interaction style with voice input/output, making the assistant more engaging and user-friendly.

Weather sites and More

- Developed and deployed a responsive weather application using HTML, CSS, JavaScript, and APIs.
- Implemented city-based search with real-time weather data and mobile-first UI, improving accessibility for 100+ users.
- This application featuring dynamic icons and micro-animations that improved engagement and user satisfaction.
- Deployed on GitHub and adopted by 50+ students from my college for daily use.

Binance-Bot

- Created a Python trading bot for Binance Futures Testnet, supporting market, limit, and OCO orders via REST APIs.
- Automated trade execution and logging, enabling hands-on understanding of algorithmic trading.

SKILLS

Programming languages

Python, Java, C, Advanced Data Structures

Web development

React.js, Flask, HTML, CSS, JavaScript

Data and Analytics

Data Analysis, EDA, Predictive Modelling

AI & Cloud

Microsoft Azure, Gen AI, Prompt Engineering, Ai Tools

EDUCATION

B.TECH: COMPUTER SCIENCE & ENGINEERING

Raghu Engineering College (Autonomous)

- Coursework in Computer Science Engineering

Expected: 2028

Visakhapatnam, Andhra Pradesh, India

CERTIFICATIONS

- Data Analytics Virtual Internship - Tata
- Microsoft Certified - Azure
- GenAi and Javascript - LinkedIn and HackerRank
