PROFESSIONAL SUMMARY

A driven and versatile Full-Stack Developer with a strong foundation in Python, React, and cloud technologies. I'm passionate about leveraging data analytics and AI to build innovative and scalable solutions that address real-world challenges. My experience in developing full-stack projects, including a voice-controlled AI assistant, demonstrates my hands-on approach and ability to create impactful digital experiences. As a fast learner, I am eager to apply my skills and technical expertise to a dynamic team. I am committed to continuously growing my skill set to contribute to meaningful projects.

EXPERIENCE

TATA

Data Analytics • Internship

07/2025 to 08/2025

- Completed a GenAI-powered analytics internship, focusing on solving real-world data problems.
- Conducted Exploratory Data Analysis (EDA) and built predictive models using a structured AI strategy design.
- Generated key business insights by effectively handling missing data and providing data-driven justifications for model selection.

SKILLS

- Programming languages:** Python, Java, C, Advanced Data Structures
- Web development:** React, Flask, HTML, CSS, JavaScript
- Data and Analytics:** Data Analysis, EDA, Predictive Modelling
- AI & Cloud:** Gen AI, Prompt Engineering, Ai Tools

PROJECTS

AI-Powered Personal Voice Assistant (Jarvis)

Python-based Intelligent Assistant | Individual Project

- Applied modular programming practices, API handling, and error management to ensure robust and scalable performance.
- Enhanced user experience through intuitive voice command processing and rapid response execution.
- Gives an accurate answer for prompted question. Can pass conversations via API's

Weather sites and More

- Designed and created many Sites mainly Weather telling sites of prompted city via API, Kept fully responsive and user friendly
- And futuristic login portals and Web Toggle's like themes, coping with single click and more

CERTIFICATIONS

Certified by many top IT Companies like **Tata**, **LinkedIn**, **Microsoft**, **Skillup**, **be10x** and **HackerRank** in various fields like **Data Analytics**, **Gen AI**, **Prompt Engineering**, **JavaScript** etc.

EDUCATION

B.TECH: COMPUTER SCIENCE & ENGINEERING

2028

Raghu Engineering College (Autonomous), Andhra Pradesh, India

- Coursework in Computer Science Engineering
